

# Build a Model Climbing Frame

## STEM Activity

### Method

1. Have the playdough, sticks, and tinfoil available for the children to use.
2. Challenge the children to build a model of their ultimate climbing frame, using the resources on the table and any other resources they can find. Will their climbing frame be tall or wide? Will it have a slide, monkey bars, a pole?
3. Allow time for each child to explain their ideas about how the climbing frame will look and how it will be used.

### You will need:

Playdough

Cocktail sticks

Tinfoil
